**ENDURANCE TROPHY 2009**

When you're racing - it's life. Anything that comes before or after is just waiting" Steve MC Queen, Le Mans

After having participated and organized for many years karting events, it happens that you stop an instant to reflect and to ask you to what event you would like really to take part in, what it would really excite you..

From that point you begin to ask yourself if you're the only one to desire what you are thinking and therefore you look for some confirmations: you ask, you call, you send e-mails, and you wait for the answers.

If you get the 50% of the results that you already expected you're already in motion, if you overcome this threshold you are already racing.

Here we are racing to offer you a "Small Circus", not as that of the Formula 1, all over the world, neither as an European Championship (we know we can't ask you to pay a registration fee of about ten thousands of Euro), but a good Italian Trophy that brings you in a heterogeneous selection of circuits, to allow you to try different racing emotions, competing in an international Kartodrome, in a city circuit or in an Autodrome.

We want to put together Teams of enthusiasts and Corporate Teams, that can learn from each other while having fun of track. We want everybody to try the emotion and the pleasure to meet the other drivers more times in one year in five different places, to sportingly compete and to renew the challenge to the next competition, as happens to the Champions of every auto discipline.

Here you'll find all the details of our Kart Endurance Trophy 2009: [www.endurancetrophy.com](http://www.endurancetrophy.com) presentation, the rules and much more.

We confide to see you on the Starting Grid with Your Team, to shake you the hand and to sportingly wish you to get the best possible result.
